

# Your Business Deserves 5 Stars

Take Control of Your Online Reputation

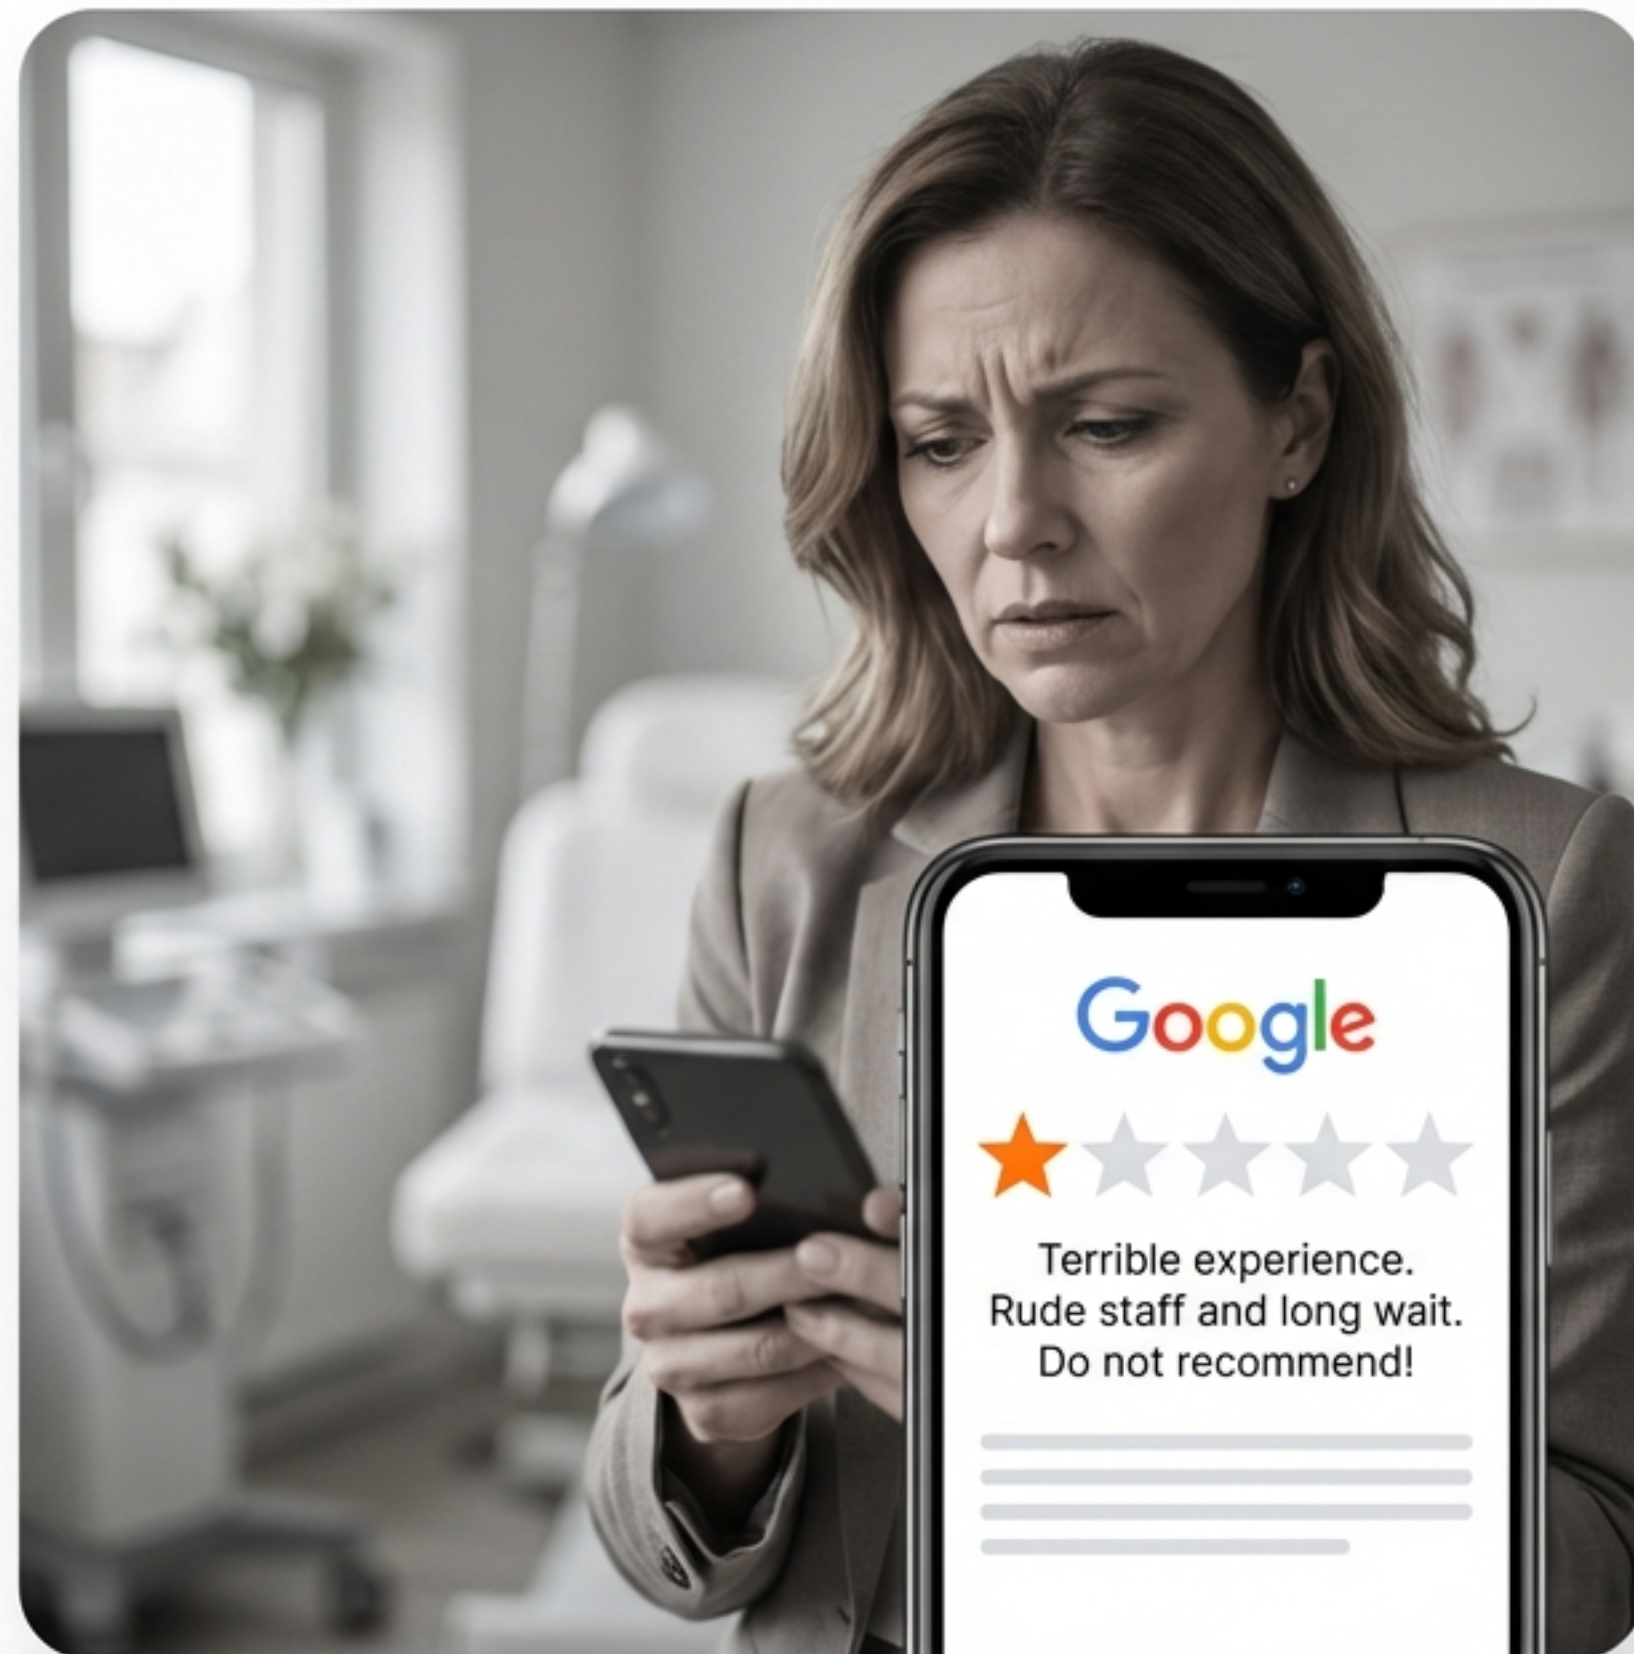

# One bad review can define your business.

You work hard to provide a 5-star experience. But a single misunderstanding can lead to a public review that hurts your reputation and turns away new customers for years.

# The real problem? Your happiest customers are often silent.

Most satisfied customers forget to leave a review. Unhappy customers, however, are highly motivated to share their experience. This creates a "Rating Gap," leaving your online score lower than the reality of your service.

**YOUR SILENT MAJORITY**

**YOUR VOCAL MINORITY**

## Reviews & Marketing

**It's time to close the gap  
and take back control.**

Introducing Reviews & Marketing: The smart  
reputation engine that puts you in the driver's seat.

# How it works: A simple 3-step process to a 5-star reputation.

## 1. CONNECT

Link your Google Business Profile in seconds to generate your unique Smart QR codes.

## 2. SHARE

Place your QR codes where customers can easily scan them—at checkout, on tables, or on receipts.

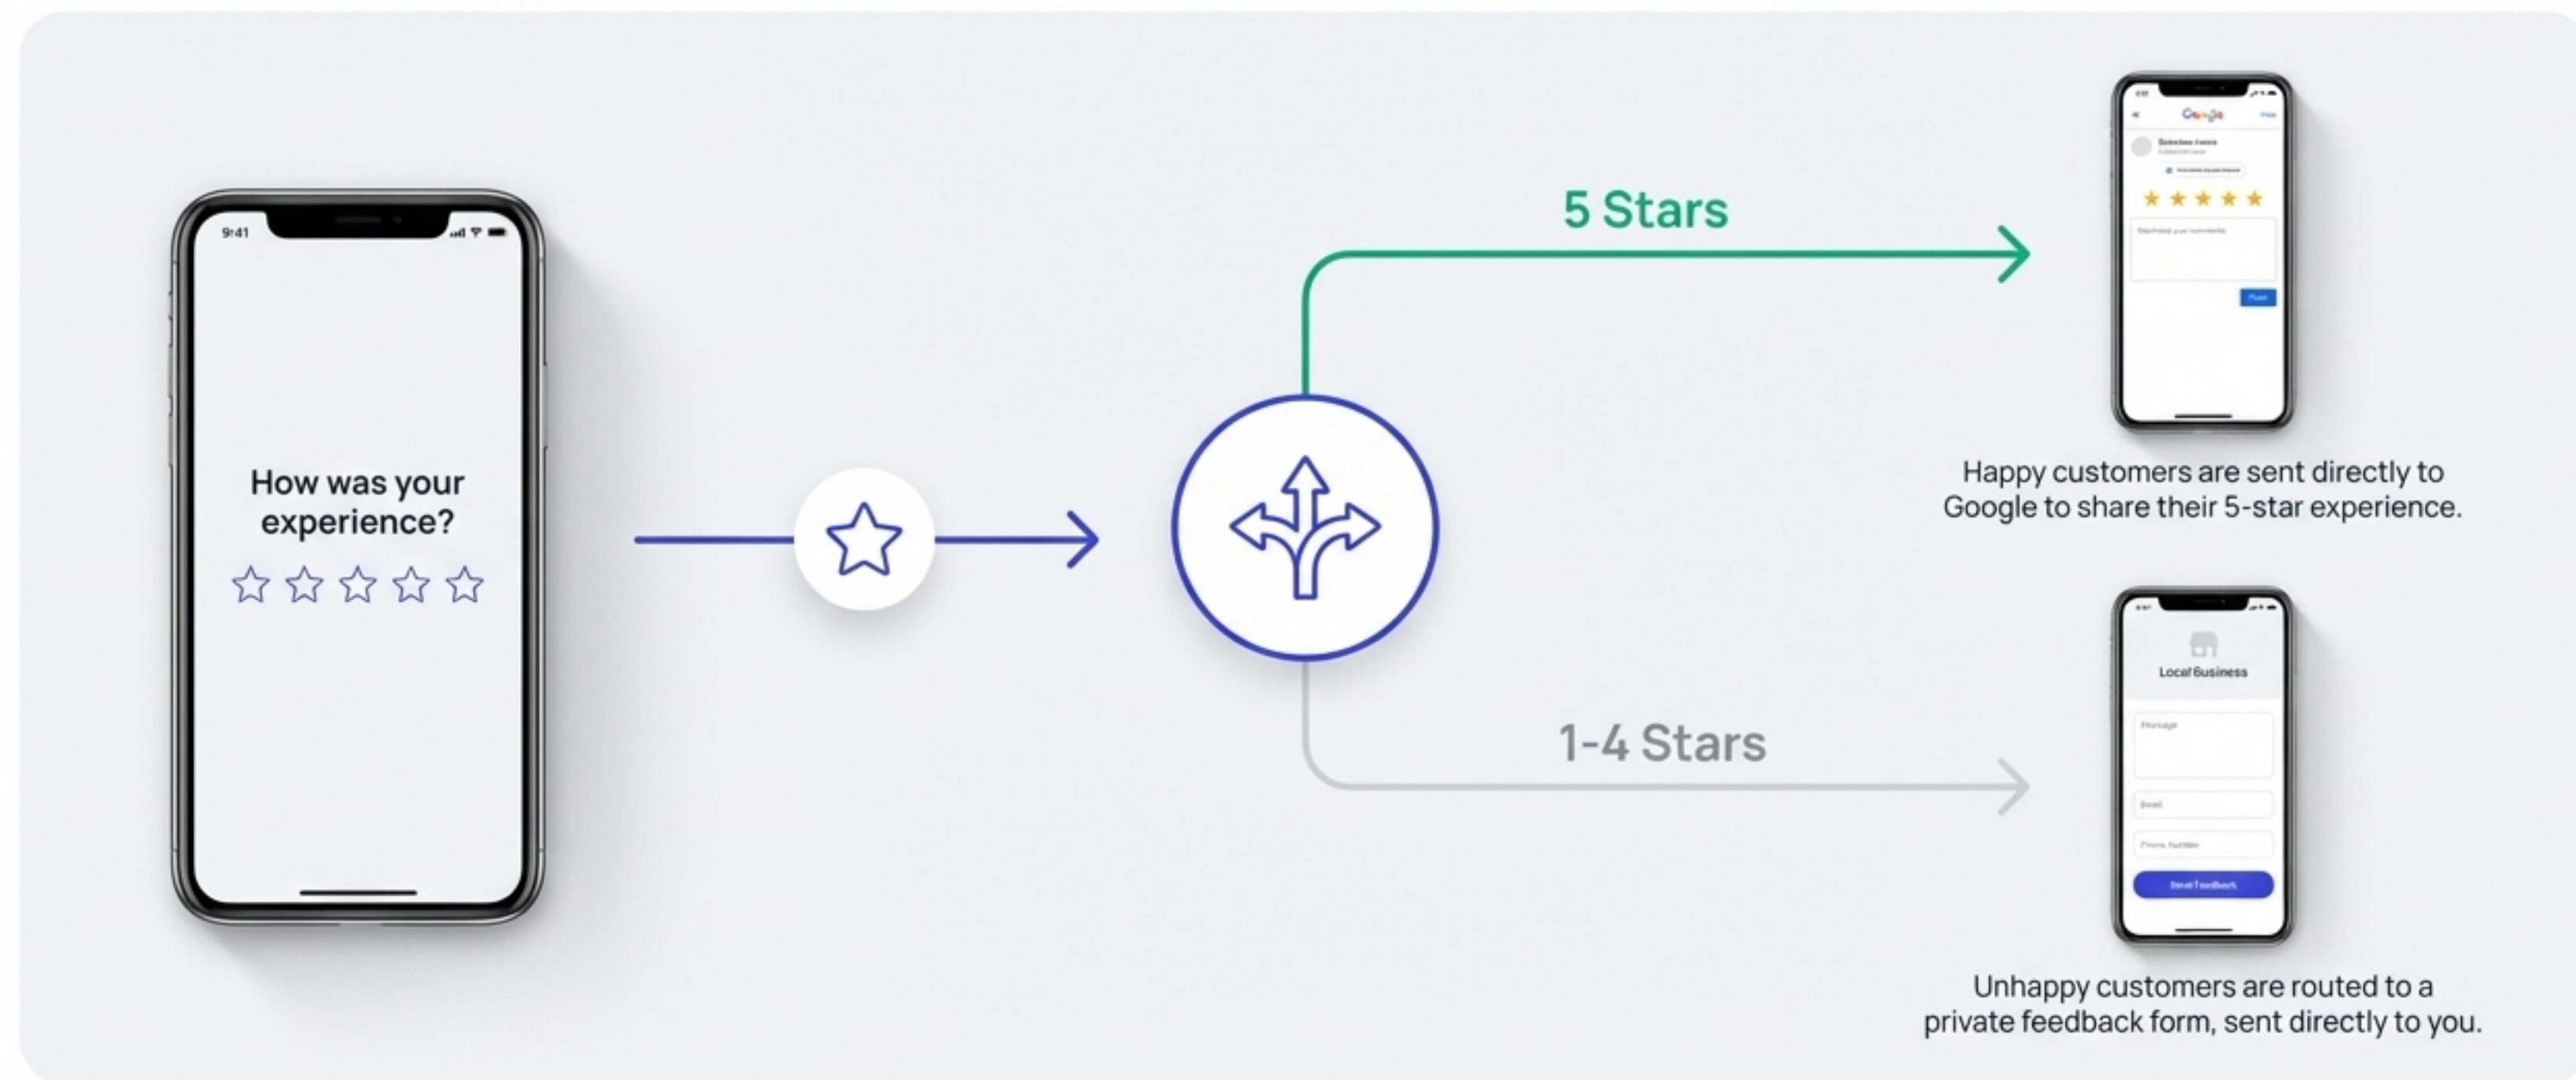

## 3. ROUTE

Our Smart Routing logic guides customers based on their sentiment, ensuring your public image reflects your best work.

# The Magic: How Smart Routing Protects Your Reputation

We identify your customer's sentiment \*before they post publicly.

# Turn a public complaint into a private conversation.

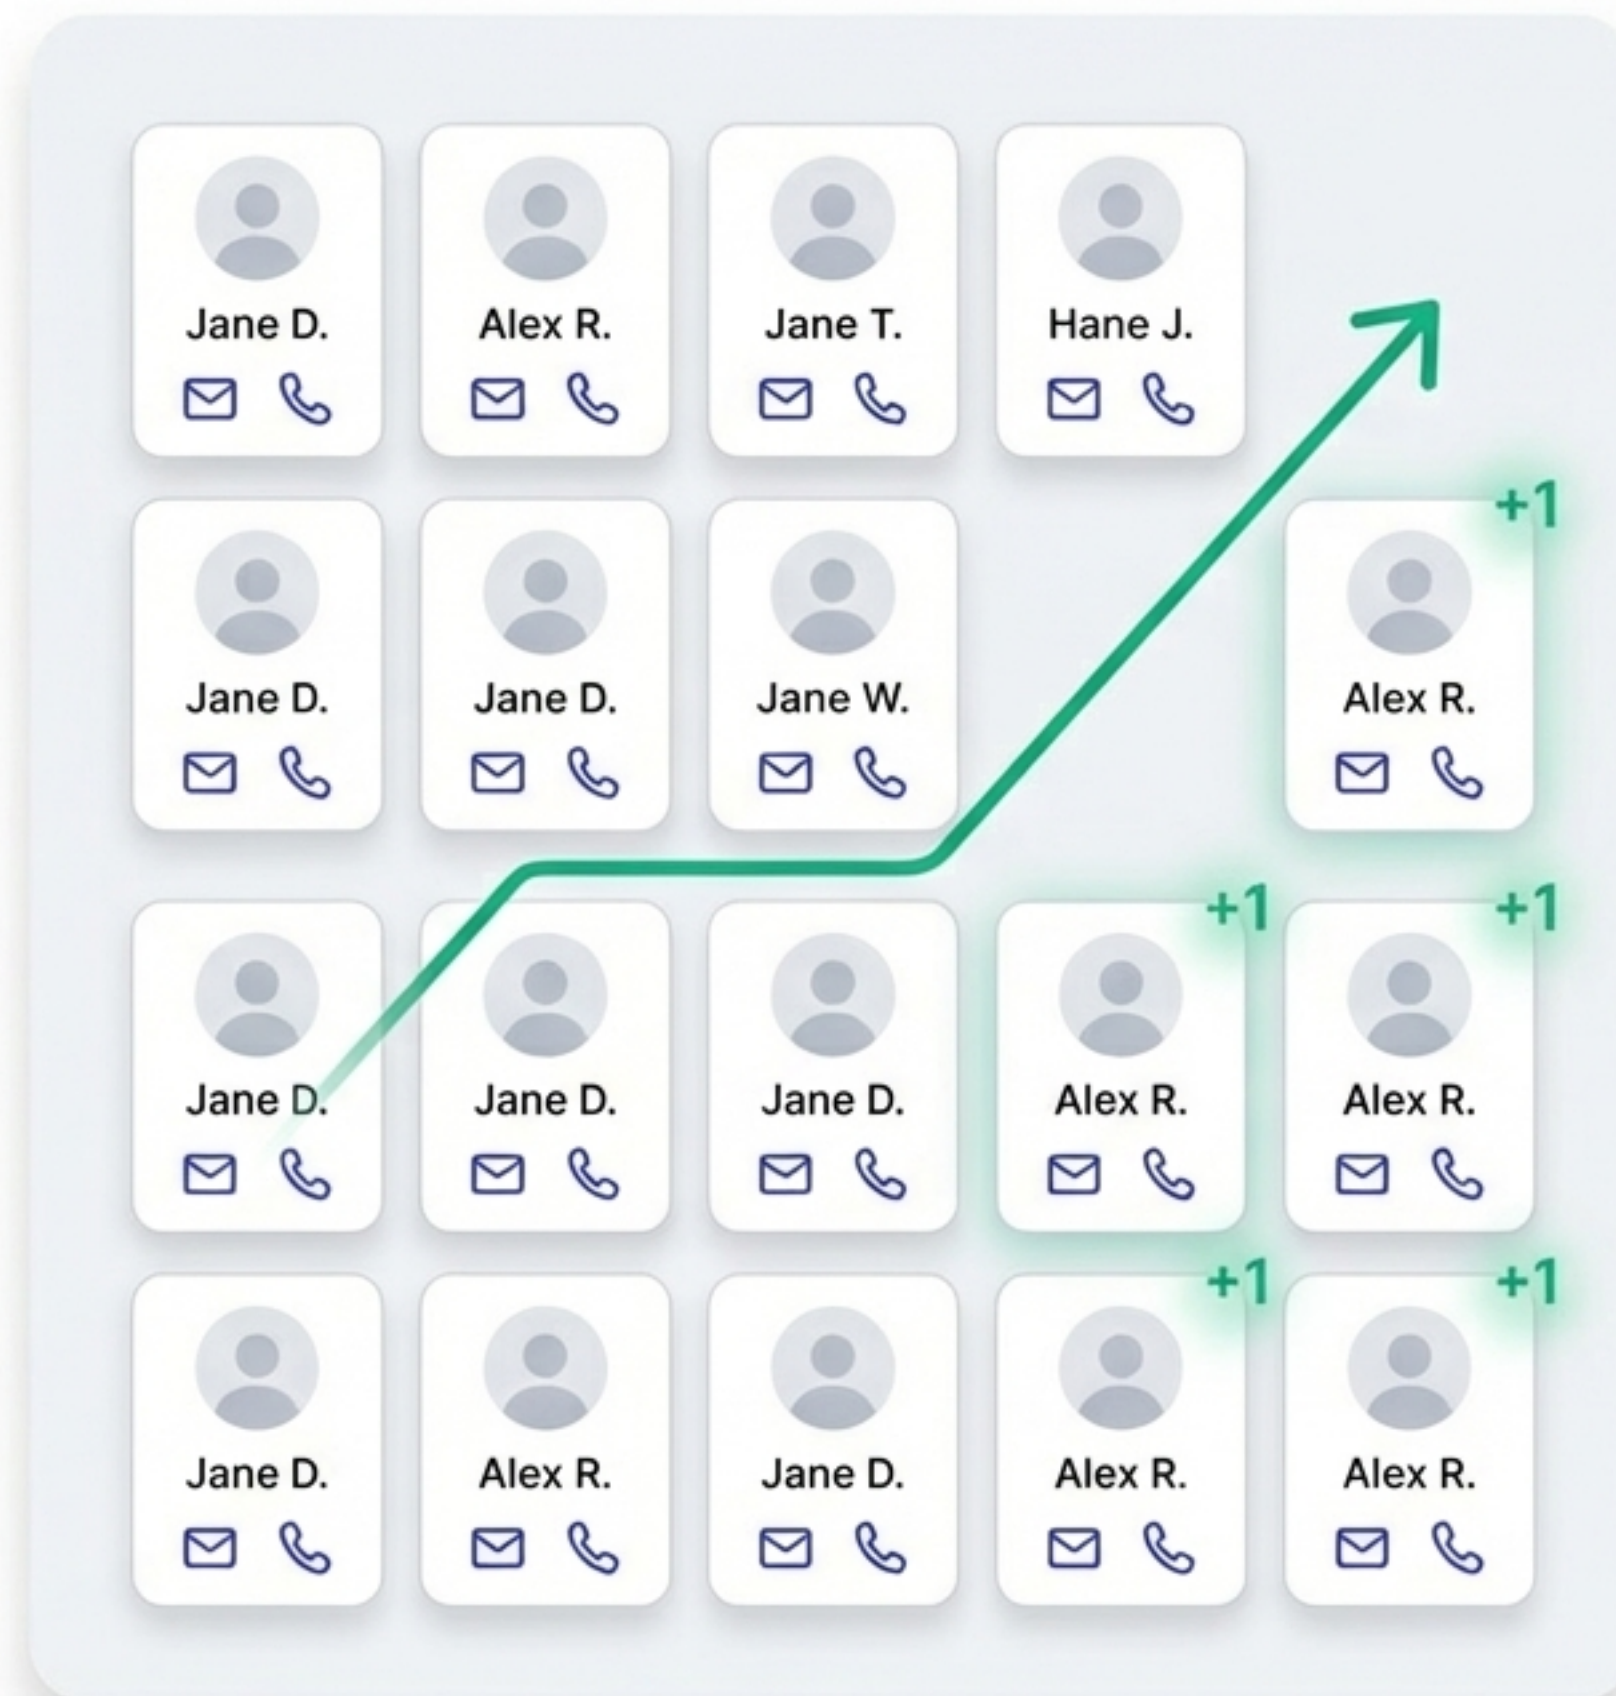

When a customer provides critical feedback, you receive their comments and contact info instantly. This allows you to resolve their issue privately and show exceptional customer service before a negative review ever goes public.

# Turn every review into a marketing opportunity.

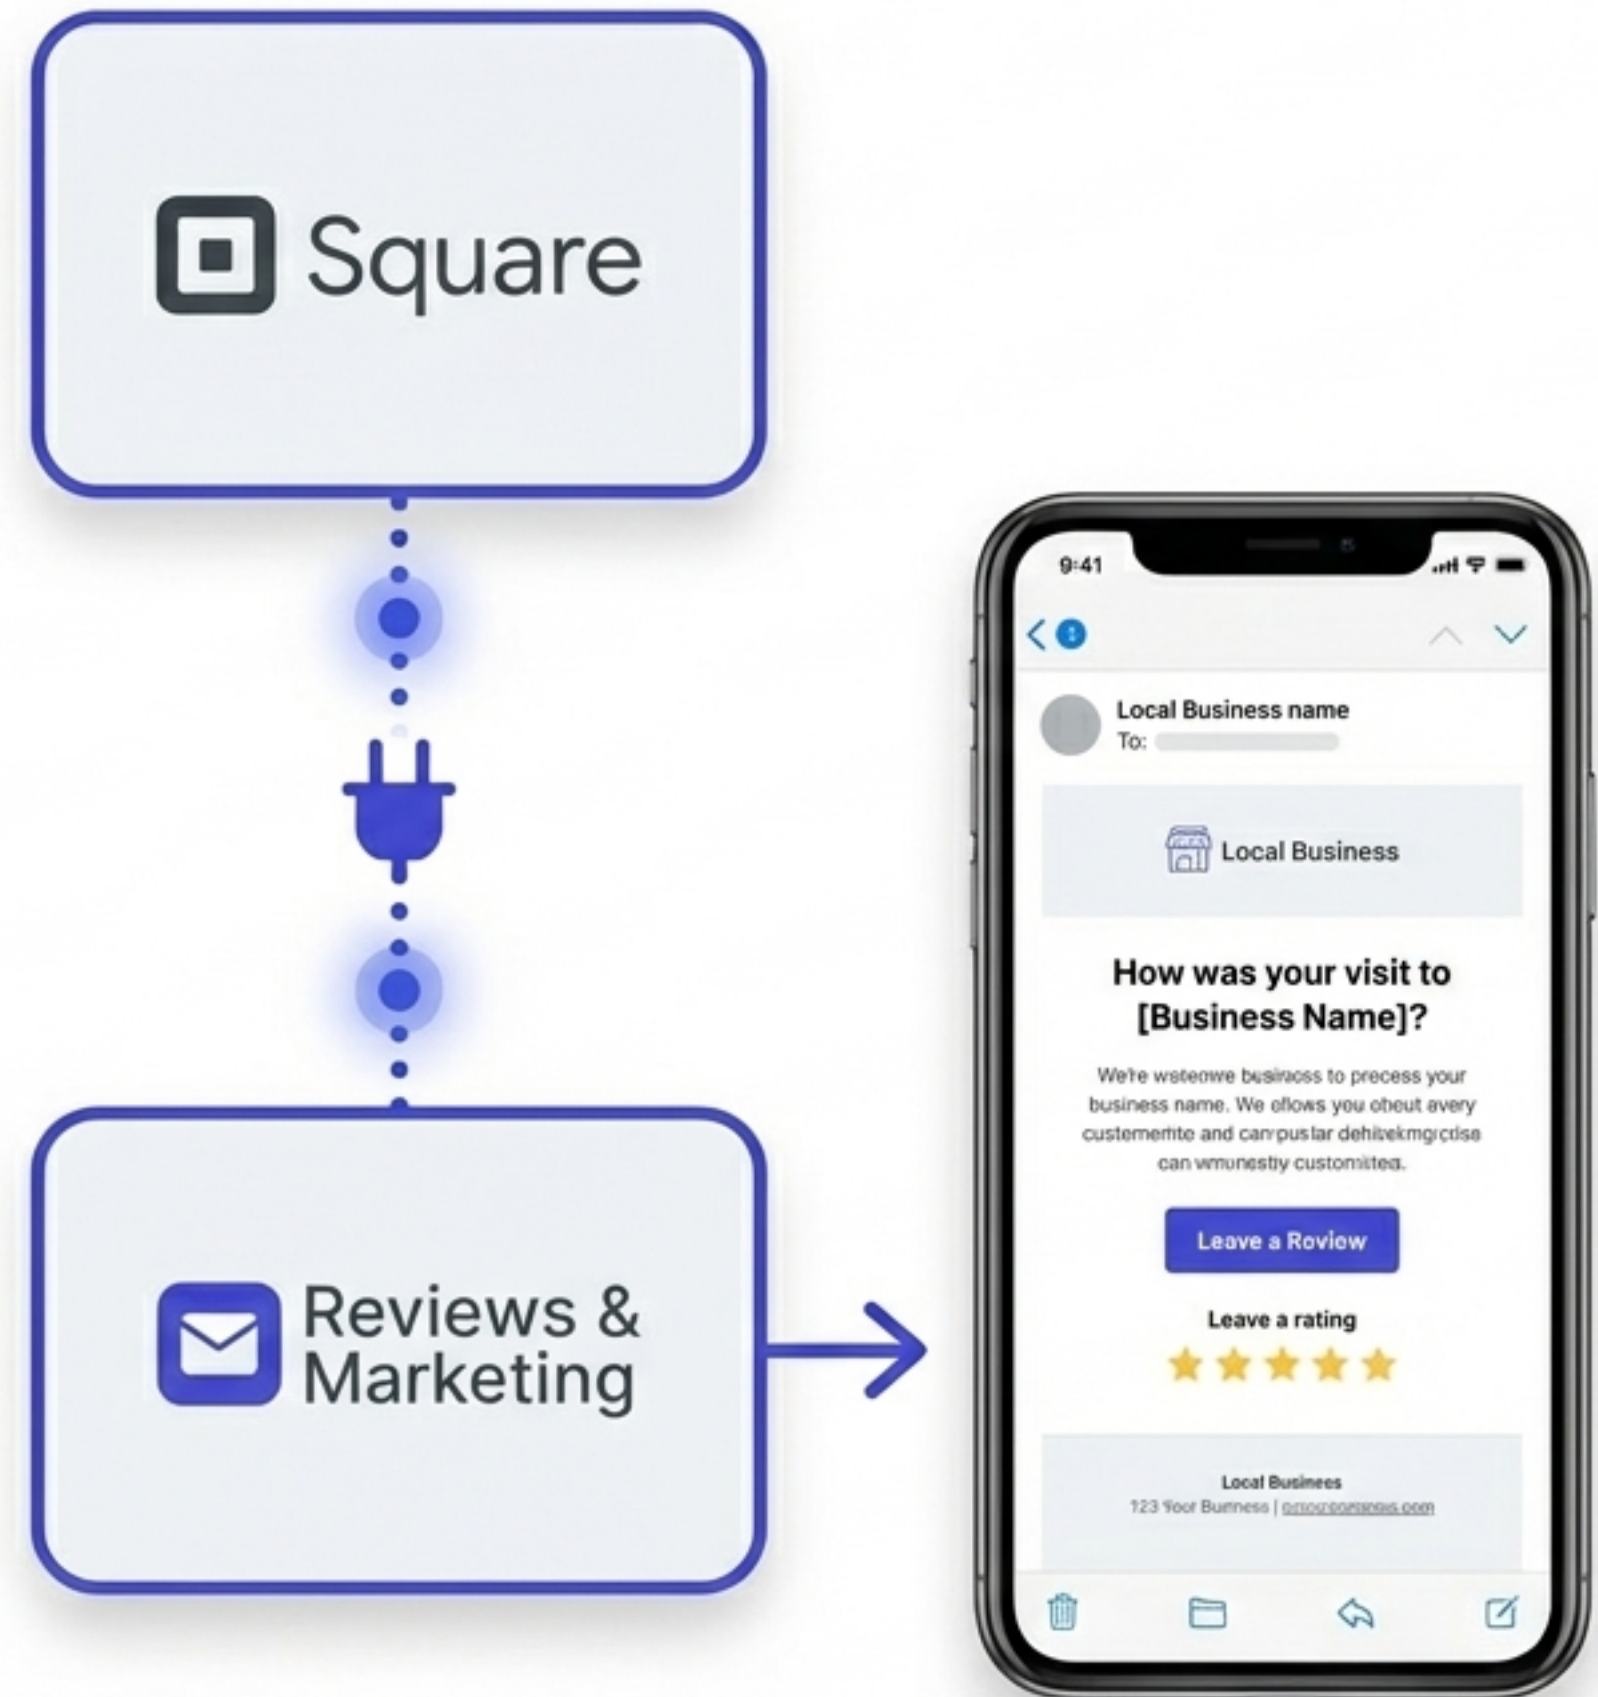

Don't just get a review, build a relationship. Every interaction invites customers to share their email or phone number for "Special Offers," turning your feedback process into a powerful engine for your customer list.

# Put Your Reputation on Autopilot with POS Automation.

Our direct integration with Square monitors your sales in real-time. A review request is automatically emailed to every customer moments after they complete a purchase. No QR codes needed, no manual effort required.

# The Result: A 5-Star Reputation and a Growing Customer List.

Stop leaving your most valuable asset to chance. Watch your Google rating climb, prevent negative reviews, and build a powerful database of your best customers—automatically.
